About This Content

This second OMSI 2 download pack is all about utility vehicles in OMSI 2.

The OMSI 2 Download Pack Vol. 2 contains a total of nine different utility AI vehicles awaiting deployment on a diverse selection of OMSI maps.

The utility vehicles are not directly drivable, but they make the traffic on each map much more realistic.

Every bus driver knows all too well what a challenge these vehicles present. Trundling slowly along, they make it hard for drivers to keep to their timetables.

Vehicles like street sweepers and construction vehicles move far more slowly than ordinary vehicles and need to be overtaken with skill.

A total of nine vehicles ranging from refuse collection trucks to multifunctional light trucks are ready to roll onto the streets. Each boasts different repaints, and some also have their own animations (flashing warning lights or rotating brushes) and their own special sounds.

In order to maintain game speed even while adding more AI vehicles, all models have been optimised and adapted for top performance on the OMSI 2 maps. These vehicles are new and have not yet been used in any commercial OMSI 2 Map Add-On.

The package includes modified AI vehicle lists for the most-played OMSI 2 add-ons, among them Aachen, Berlin X10, Gladbeck, Hamburg Day & Night and Rheinhausen, and for the freeware maps Ahlheim, Blankwitz, Krumenaab, Lemmental and Städtedreieck.

With the OMSI 2 Download Pack Vol. 2 AI vehicles, modern maps look even more realistic and virtual driving comes another step closer to driving in real traffic conditions.

NOTE

Further distribution of the vehicles in the OMSI 2 Download Pack Vol. 2, whether individually or together with freeware maps, is not permitted for reasons to do with copyright.
