---

SSD/HDD is an equivalent of a new Windows installation (i.e. I need to keep the same license). I read about moving a Windows installation but I'm not sure if this works for my scenario. I have tried to manually move the Windows installation and move the "Users" folder to the new location (including passwords, drivers and registry settings). But when I restore the "Users" folder I get the error "Restoring is not supported on the new system. If this has been caused by recent software changes, uninstall the software or follow the troubleshooting advice on the. I have the problem described there. I also read about the /Recycling switch on Windows Disk Management but it doesn't really solves my problem. I've also tried this script: but it doesn't work as well and I can't understand what is the reason behind it. Thanks in advance. A: I've had the same issues with Windows 82157476af
